

School Cafeteria Cibecue, AZ

Temporary Kitchen & Cafeteria:

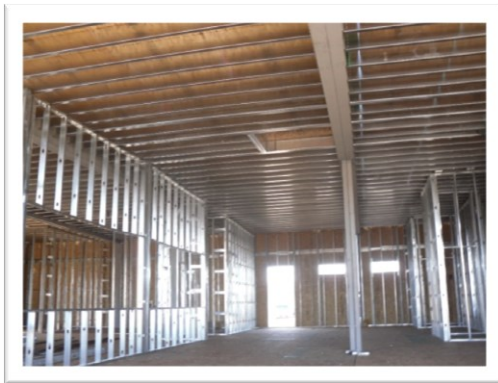

This BIA school was under renovation. Their cafeteria and food service kitchen were going to be out of service. With few choices to bring food in, it made sense to design a temporary building to service the kids dining needs

Commercial Kitchen & Cafeteria-Cibecue, AZ

The BIA was constructing a brand new school renovation for Cibecue School in Arizona. The project was going to have their kitchen and dining area closed down for the school year. Modular Solutions designed and installed a relocatable modular building that could be used at this school and any other BIE school campus with the same need.

There was a full service commercial kitchen with all the appliances, Plenty of restrooms, a large open cafeteria room, and a heavy duty floor. The building has been relocated since our original project location making the temporary modular concept a great success

Ready to move to the
new location and new
school project
